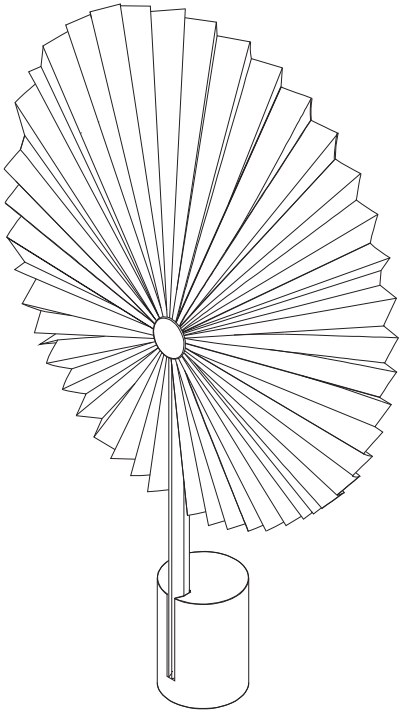
LIRIS
Portable lamp

by Kasper Friis Egelund & Thalea Schmalenberg

Instruction



CARE & MAINTENANCE

Read before installation

- Do not have the lamp plugged in while assemblying the lamp.
- Before usage, refer to the provided manual. The manual contain the needed instructions to assemble the lamp. An incorrect assembly can result in damaging the parts, the circuit and reducing the lamp's lifespan.
- Do not place any object on the lamp if they are not delivered with the lamp.
- Ensure that the power supply is OFF before cleaning the product. Use a dust broom to clean the lamp.
- The lamp gets hot when it is on. Allow the lamp to cool down before touching or cleaning.
- If a part is damaged, it shall be replaced by the manufacturer or his service agent or a qualified person.

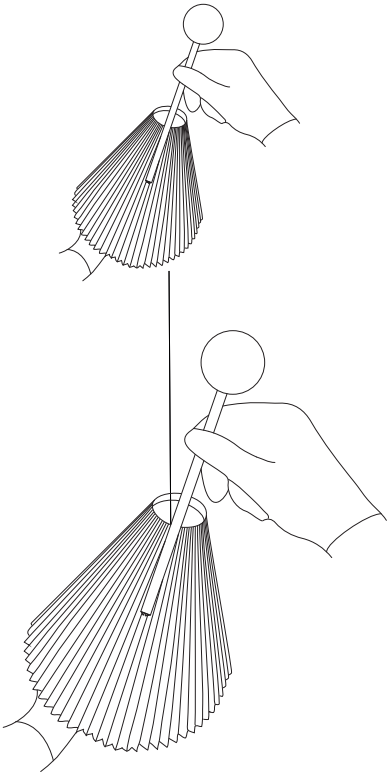
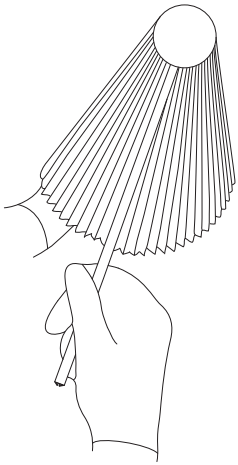
NOTE: USE THE WHITE GLOVES

GEJST

① Grab the fan holder (Part B) with one hand and the lampshade (Part E) with your other hand. Slide the fan holder (Part B) onto the stitching on the smooth side of the lampshade (Part E).

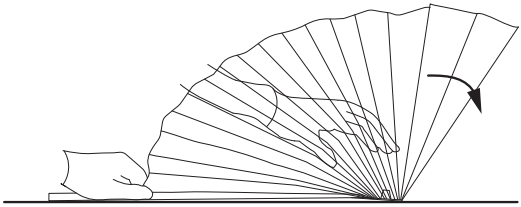


② Slide the fan holder (Part B) all the way down on the stitching track.

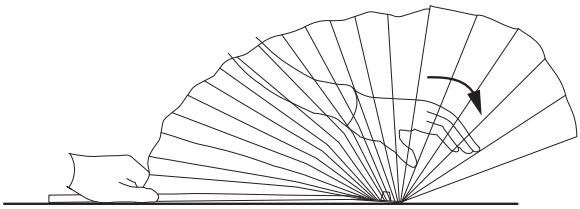


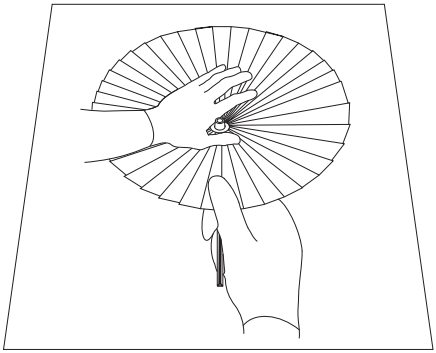
③ Place the fan holder (Part B) with the attached lampshade (Part E) on a table, with the flat side of the fan holder facing downwards.

NOTE: Cover the table with a soft blanket to prevent the parts from getting scratched.

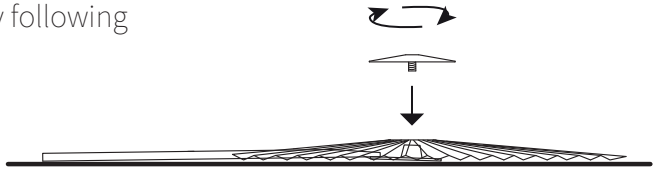


④ Hold the fan holder (Part B) and lampshade (Part E) with your one hand. Press the lampshade flat on the table with your other hand.

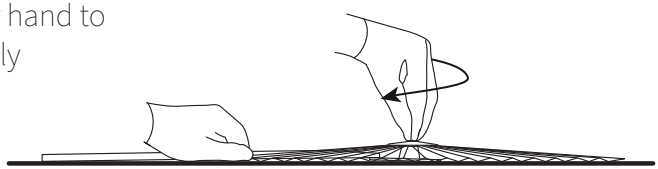




⑤ Screw the top cover (Part A) onto the fan holder (Part B) by following the next step.

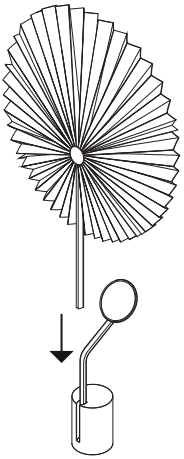


⑥ Grab the fan holder (Part B) with your one hand and use your fingertips from the other hand to fasten the top cover firmly (Part A).

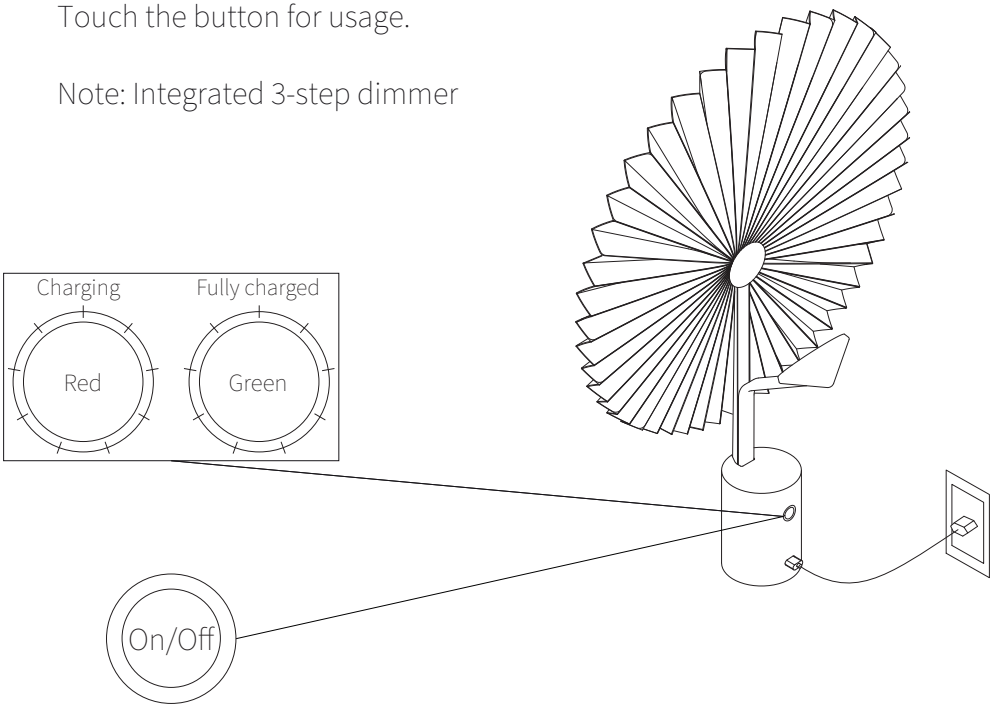


NOTE: Take care not to force the tightening operation

⑦ Place the assembled fan parts in the base (Part D), by sliding the fan holder (Part B) into the groove.



⑧ When the lamp is charging it will show red and when it is fully charged the light will turn green. It will keep power for approximately 10 hours.

Touch the button for usage.


Note: Integrated 3-step dimmer
