

Aluna series

Designed by Quaglio Simonelli, France

Quaglio Simonelli created the Aluna lamp series with an architectural eye for detail, with an elegant shape that will be a beautiful focal point in any space. The large volume of the shade adds an opulent look to your dining table, and the subtle detail of the brass covered cord adds a luxurious expression to the design. Inside the dome an opaque diffuser softens the light while hiding lightbulbs.

Meet the designer

Quaglio Simonelli is a design duo comprised of two creative individuals, both born in Italy and now based in Paris. Thinking that diversification is a source of creative richness, we design technology products, furniture, lighting and decorative objects, conceive the visual identity and product design for beauty brands, alternating industrial logic with an artisanal approach. Our complementary sensibilities induce our designs with the creative gaze of two histories combined. Inspired by the world that surrounds us and by our own impacts and interpretations. We create design that appears familiar at first glance, but at the same time it's adorned with unexpected, almost poetic elements. Our philosophy is 'never see things as they are'.
