

Campa series

Designed by Spant Studio, Denmark

The Danish architecture studio, Spant, is behind Campa. A series of lamps with a distinctive, elegantly shaped shade in fluted opal glass and with refined details in wood. The idea behind the design was to create simple lighting without too many components, that would still be eye-catching. The light source and shape have been carefully designed to do just that. The shade contour creates a downward light and the translucent opal glass emits a beautifully diffuse light.

Meet the designer

As the world grows ever more complicated, we strive to create simple and meaningful getaways, retreats and pieces of design with a unique experience for the demanding customer. The spaces that surround us have great impact on the quality of our lives. Hence, we dedicate our professional lives to contribute to the Scandinavian heritage of architectural design – the art of designing holistic and immersive experiences. We really do believe that simple and attractive aesthetics can heighten the feeling of being alive and add a certain degree of mental health to our existence. Our wish is to design objects that hold the potential of achieving that goal. We design objects when we are presented to a given possibility to contribute with something beautiful and meaningful. It is not a crusade but an invitation.
