Brick Candle Holder, Low - Limestone

Designed by

Kristian Sofus Hansen &
Tommy Hyldahl

Brick Candle Holder, Low - Limestone

Product Description

Inspired by architectural building components, the Brick Candle Holder is made of exquisite solid limestone from Egypt, elegantly carved in sharp geometric shapes.

Each candle holder is completely unique, emphasizing the rich and beautiful patterns of natural stone. The polished surface softly reflects the light from the candle, adding a warmth to the Brick Candle Holders.

Combine the Low Brick candleholder with the Tall Brick Candelholder, in a slightly different shape, complementing each other in an architectural composition or stand alone as sculptural object.

We do not recommend burning candles closer than 3 cm from the candleholder.

Designer Description

Tommy Hyldahl and Kristian Sofus Hansen intertwine their distinct sensibilities to create designs where storytelling, materiality, and timeless form meet in quiet harmony.

With a background in fashion, Tommy brings an intuitive eye for trends, colors, and textures. His process is one of layering histories, blending details and references from past design periods and reimagining them into something fresh and contemporary. Each collection unfolds as a narrative, evolving from concept to creation, with every element contributing to a greater story.

Kristian, who has lived and studied in Japan, seeks to unite Japanese aesthetics with Danish design, creating a characteristic twist on simplicity itself. His work is defined by the search for subtle, original details that elevate each piece with a unique signature. Drawing inspiration from art and sculpture, his creative process unfolds in new and exciting ways, always striving to craft designs that are both functional and timeless.

Together, they craft design that transcends time, poetic yet practical, expressive yet enduring.

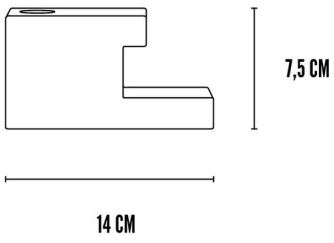

Brick Candle Holder, Low - Limestone

Family Description Text

The Brick Collection is born from the language of architecture, where structure becomes poetry and light transforms space. Each candleholder is hewn from natural stone, its sharp geometric lines echoing the elemental building blocks that have shaped civilizations for centuries.

No two pieces are ever the same. Within every cut, the stone reveals its own story veins, textures, and patterns formed in silence over millennia. Each candleholder is therefore not only an object, but a fragment of the earth, carried into the home.

When the flame is lit, the transformation begins. What was once cool and solid turns warm and luminous, as polished planes capture and reflect the glow of firelight. By day, it stands as a quiet sculpture of weight and form; by night, it becomes a vessel of atmosphere, softening the interior with its glow.

The Brick Collection invites us to see candlelight as more than illumination, as an architectural gesture, a dialogue between material, form, and warmth that endures through time.

Color Description

Our limestone is defined by a soft, sand-beige tone with gentle warmth drawn from its geological origins. Subtle variations in beige shades create an organic depth, evoking the timeless character of stone shaped over millennia. Calm and versatile, this sand-beige colour conveys quiet elegance and serves as a refined foundation for both modern and traditional settings.

Brick Candle Holder, Low - Limestone

Maintenance Guide Description

Thank you for choosing the 101 Copenhagen Candleholder. This product is crafted from natural stone and is designed to bring timeless elegance to your space. As natural materials are sensitive to heat and staining, proper care is essential to preserve the beauty and integrity of your candleholder.

Important Usage Instructions:
To ensure safe use and prevent damage, please follow these guidelines:

o Only use candles that fit securely and upright in the holder without forcing them into place.
o Never allow candles to burn closer than 3cm (1.2 inches) from the surface of the stone. Direct and prolonged heat can cause discoloration, cracking, or thermal shock to natural stone.
o Always extinguish the candle before it reaches this minimum distance.
o Never leave a burning candle unattended. Keep away from children, pets, drafts, and flammable materials.
o Use a candle snuffer to extinguish the flame rather than blowing it out, which can cause hot wax to splatter.
o Allow wax to cool and harden fully before cleaning.
o Gently remove wax using your fingers or a dry, soft cloth. If necessary, you may use warm water with a soft, non-abrasive cloth. Avoid acidic cleaners, bleach, or harsh chemicals, as these can stain or damage the natural stone.
o Store your candleholder in a cool, dry place away from direct sunlight to prevent fading or thermal damage.

Warning: Fire & Breakage Hazard
Failure to follow the 3cm minimum burn distance may result in severe heat damage, including cracking, breakage, or complete failure of the candleholder. This creates a potential fire or injury risk and renders the product unusable. Damage caused by improper candle use is not covered under warranty.

Materials Description

Formed over millennia by ancient organisms and geological forces, limestone holds a story within every layer of its structure. Its natural softness allows for delicate shaping, a quality that has made it a cornerstone of architecture and design throughout history.

Our limestone is carefully sourced through a meticulous sampling process, ensuring that each piece meets our exacting standards for color, texture, and integrity. Subtle variations in tone and pattern reveal its organic origins, making every surface unique. Durable yet refined, limestone brings a sense of timeless depth and natural elegance to furniture, grounding interiors with quiet strength and character.
