

Attention Note

Abri Lantern

The Abri Lantern is made from stainless steel and is therefore suitable for indoor and outdoor use. Exposure to the elements can affect the lantern over time. We therefore advise you to bring the lantern inside during cold weather.

Use only one block candle with a max. height of 10 cm / 3.9 in and max. width of \varnothing 7 cm / 2.7 in. You can also use an LED light.

Place the lantern on a fireproof, heat-resistant material that is a safe distance away from combustible materials. The lantern can get hot during use, so do not touch the base until it has cooled after use. Use the handle if you want to move the lantern. Never leave a lit candle out of sight.

Clean the lantern with a damp, soft cloth. Please do not use any sharp objects or abrasive surfaces for cleaning. Please also make sure to empty the glass cylinder and the cup holder if water should accumulate.
