

About the Design

Barocco, which originally meant a pearl of irregular shape, is perfectly imperfect, since it is rich in variation and has the same quality you find in wood, which also varies and contributes with uniqueness to a uniform design.

Description

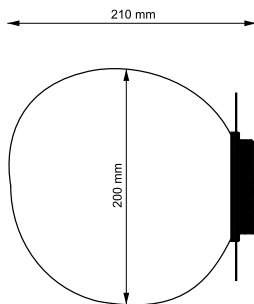

The lamp shade is produced from 2-3mm thick mouth blown glass, with a matte surface and finished with a solid brass disc. The lamp comes with a mount that can be directly mounted on Kaiser wall boxes.

Recycling

We promote responsible handling of the product, including its end-of-life stage.

The luminaire is composed of precious materials and must be decommissioned and disassembled to recycle the resources for other merchandise.

This item has been engineered to enable complete disassembly and reuse of most of its components.

Packaging

The item is enclosed in a plastic bag along with 100% biodegradable FSC labeled cardboard, both of which can be conveniently separated and processed through recycling channels.
