

## Donut series

Designed by Michael H. Nielsen, Denmark

---

Donut is a rechargeable outdoor lamp designed by Michael H. Nielsen. An elegant and festive lamp that can be moved around and placed on the table or hung on a branch when your guests move around the garden during long summer evenings. The lamp can be turned on and off with a single quick movement and provides up to 16 hours of light when fully charged.

### Meet the designer

My style is characterized by keeping the focus on the detail and "edge" that separates my designs from the crowd. One of my biggest influences is to register how much diversity there is among people and try to meet the very different needs that it creates. I've always been fascinated by the craftsmanship and the interaction between craftsman and designer. Good design is what gives meaning and value to the people who use it.
