Installation instructions

GENERAL INFORMATION

- Before any work turn off the mains supply.
- Installation should only be carried out by a qualified electrician, who should be aware of the current Regulations on Internal & External Installations.
- In case of glass breakage, replace immediately.
- Lightbulb Wattage should never exceed the Wattage (W) indicated on the label or the packaging of the light fixture.
- The product should be connected to a line protected by a differential current circuit, while the nominal persistent operating current should not exceed 30mA (leakage relay).

LIGHT FIXTURE INSTALLATION

1. MOUNTING THE LIGHT FIXTURE

- Using the base of the light fixture as an installation guide, mark the surface on which you wish to mount it.
- Drill holes on the mounting surface and insert the wall-plugs.
- Insert the stainless steel hex head M5 screws into the back plate.
- Pass the supply cable through the back plate using the supplied rubber inlet.
- Screw the back plate on the mounting surface with the supplied screws.
- Attach the terminal block to the back plate.
- Connect the power cable and the light fixture cable wires to the terminal block, using the L (Line: Brown wire), N (Neutral: Blue wire) and Grounding: Yellow wire) \perp symbols as reference.
- Place the fixture on the back plate and fasten it, screwing the M5 brass blind nuts by hand onto the stainless M5 hex head screws. Fasten them in place, using a wrench. 1 full 360° revolution of the wrench is enough.
- Unscrew the cage and remove the glass of the light fixture.
- Screw the lightbulb into the lamp holder.
- Replace the glass and screw the cage and screw the cage on the body of the light fixture.
- Turn on the power supply

2. REPLACING THE LIGHTBULB

- Turn off the mains supply.
- Do not try to replace the lightbulb unless it has completely cooled down as it may cause serious burns on the skin.
- Open the lightbulb's cover.
- Twist and pull the lightbulb gently.
- Do not touch the lightbulb with bare hands.
- Always use clean protective gloves when handling a lightbulb.
- Use a clean towel to clean the lightbulb in case you touch it accidentally.
- When replacing the lightbulb, twist it very carefully while the lightbulb is still in the lampholder.
- Before turning on the power supply again, replace the lightbulb's cover to maintain the impermeability of the fixture.
