

# Mounting Instruction

## Marie Michielssen - Floor Lamp Earth

B7221181

### Luminary specs

**TYPE** Floor Lamp

**COLOR** White

### DIMENSIONS

L70 x W50 H37 cm

L27 1/2 x W19 5/8 H14 5/8 inch

**SWITCH** Footswitch

**CABLE LENGTH** 2m

### Bulb type

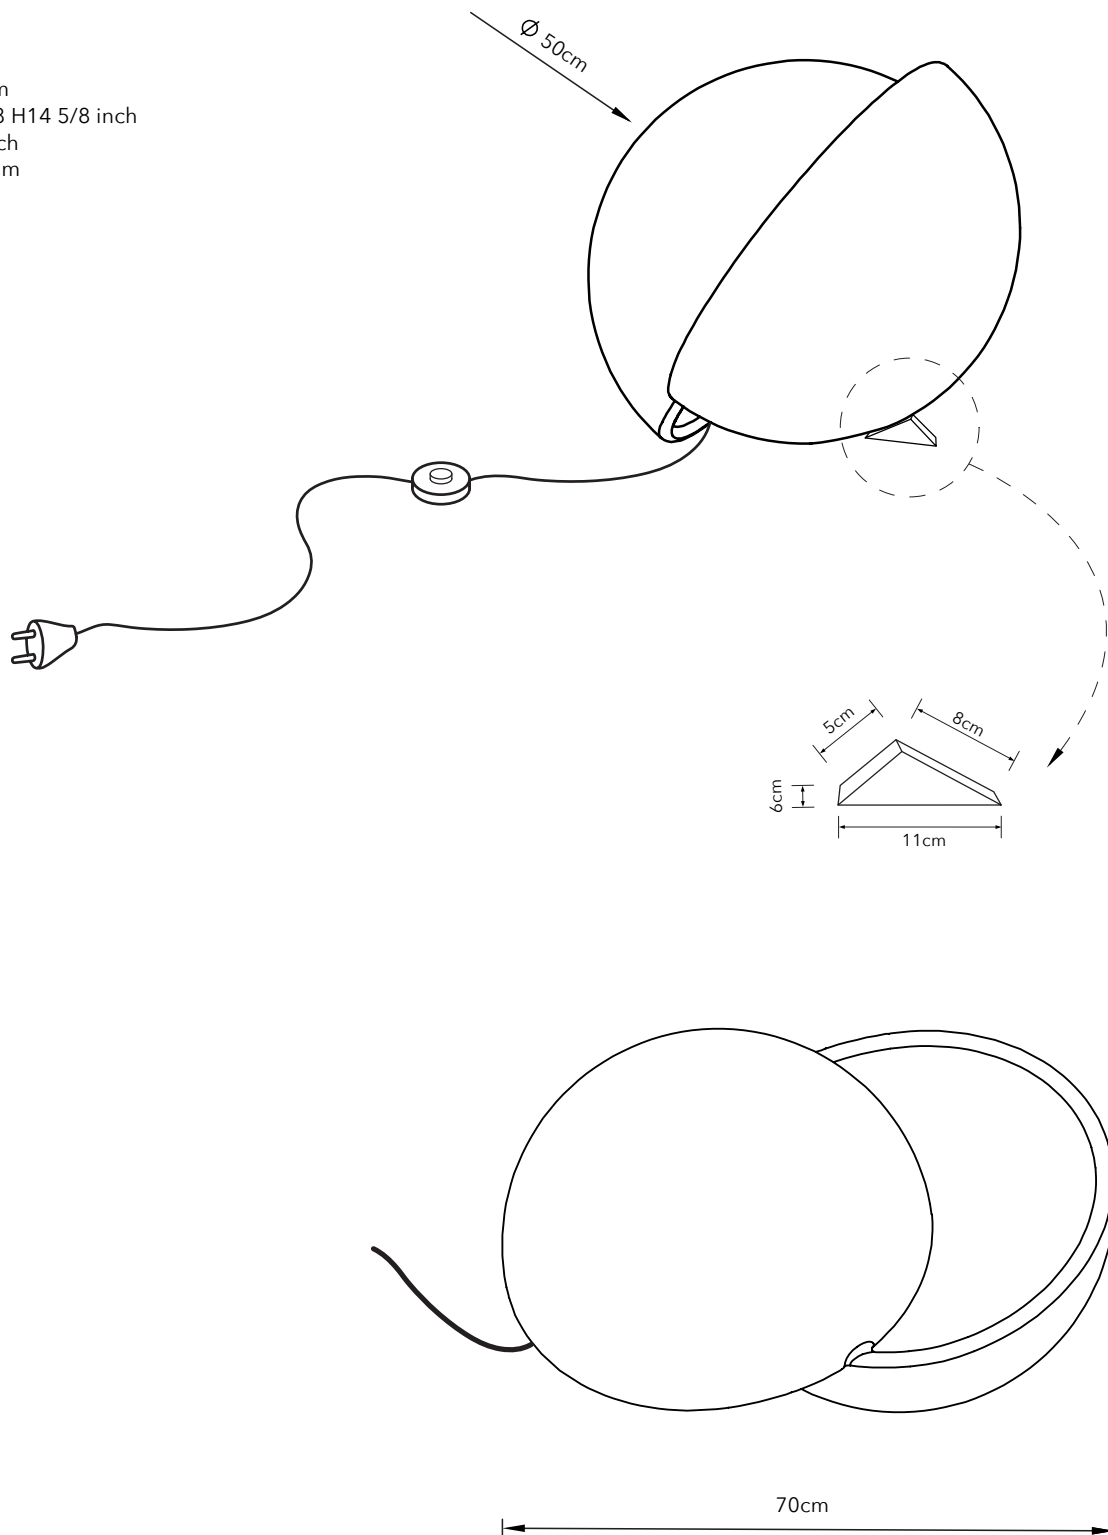

E27

Bulb included

Max. 5W

### Class II

### Supplied

## Instruction to install the light bulb into the lamp

STEP 1 The socket is mounted on a small magnetic plate.

STEP 2 Gently take out the plate with the socket.

STEP 3 Turn the bulb into the socket.

STEP 4 Last step, click the plate with the socket back onto the magnetic part inside the lamp.

# Safety Precautions

Please study the instruction manual and below information carefully before installing or using this product.  
Please keep this user manual for further reference.

1. The luminaires may only be installed by authorized and qualified technicians according to the valid regulations for electrical installation.
2. Maintenance of the luminaires is limited to their surfaces. During maintenance no moisture can come into contact with any areas of the terminal connections or voltage control parts.
3. The electrical supply must be switched off at the outlet, preferably by means of a switch in the distribution box, before any installation, maintenance or repair work is undertaken.
4. Exterior light must not be installed during rain.
5. Take account of the minimal separation distance from other objects and the room required around the fitting.
6. If in any doubt, consult a professional, taking local installation requirements into account. Some countries stipulate that lighting may be installed only by registered installers.
7. Clamping screws in electrical connections must be adequately tightened. This is particularly the case with 12V low voltage conductors.
8. When replacing a halogen lamp, wait for it to cool, for a minimum of 5 minutes.
9. Clean with a clean, dry cloth or brush, use no solvents or abrasives. Avoid dampness on all electrical components.
10. Take account of all available technical information.
11. Take note of the symbols when connecting wires:

N = Neutral

L = Live

 = Earth

12. If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.
13. Meaning of symbols:

For indoor use only, where direct contact with water is impossible

Protection class 1: the fitting must be earthed

Protection class 2: the fitting is double insulated and does not require earthing

Protection class 3: the fitting is low voltage

Observe the indicated minimum distance between the lamp and the illuminated materials/objects

Only the self-screening halogen illuminants should be used with the luminaire

Strip the wire to the indicated length

Connect using the specified cable

The fixture can be used in combination with a dimmer. Consult the sales outlet for the correct type of dimmer (important in the case of 12V fittings)

The maximum wattage indicated in each lighting unit, for example, must not be exceeded

This luminaire cannot be disposed together with normal domestic waste in standard rubbish bin, but you have to bring it to a staging area for electrical waste

This luminaire was designed to work only with the indicated voltage
