INTRODUCING NEW CEILING AND WALL VERSIONS OF PIX LAMP

Normann Copenhagen is delighted to announce the expansion of its Pix Lamp collection with the introduction of four new, versatile ceiling and wall versions. Building upon the success of the recently-launched Pix Lamp design, these new variants offer even more versatility and design possibilities.

The ceiling and wall versions of Pix come with a canopy in silver-painted steel, allowing for easy installation on either walls or ceiling surfaces. They can be conveniently connected directly to the power outlet or through a power cord via a hole on the side of the canopy. The collection now includes two smaller variants with diameters of 20 cm and 30 cm, suitable for use as both ceiling and wall lamps. Additionally, two larger versions with diameters of 45 cm and 60 cm which are recommended for ceiling use only.

The Pix Lamp collection, distinguished by its timeless silhouette, has captivated design enthusiasts with its composition of recycled plastic waste and unique, pixelated expression. The lampshades are created by mixing and granulating plastic waste in various shades of white, resulting in a captivating texture and color composition. This resourceful production process allows for a circular life cycle.

The Pix Lamp's material thickness gives it an opaque appearance when the light is turned off, transforming into a translucent moon-like design when illuminated. The light radiating from the bulb beautifully highlights the granulated structure of the lampshade, creating an enchanting ambiance.

Pix Lamp's minimalistic design and versatile sizes make it a perfect fit for any space, from residential areas above kitchen counters and dining tables to living room corners, sophisticated hallways, and commercial settings such as restaurants, hotel lobbies, and department stores. Its charismatic glow and distinctive presence effortlessly blends with surrounding interiors, adding a cozy and stylish touch.

CONNECTING PEOPLE AND SPACES

Since Normann Copenhagen's foundation in 1999, our ambition has been to challenge conventional thinking and make the ordinary extraordinary through great design.

By combining the craftsmanship, functionality and endurance characterized by our Danish design heritage with modern silhouettes and durable materials, we aim to create original products in a contemporary design that withstand the test of time. We believe in uniting people and spaces across the world and improving the quality of people's lives through the power of great design.

Our products combine functionality and design and accommodate the diversity of needs of modern life in residential and professional interiors alike.
