SPLINE COLLECTION

DAVID DERKSEN

SPLINE COLLECTION

SPLINE is an indoor and outdoor LED pendant lamp.

The LED strip is a contemporary take on the more classic string lights. The combination of colourful textiles with a continuous line of light gives the final piece a festive yet minimalist feel.

SPLINE comes in two two-tone models – brown/orange and beige/blue – each measuring more than 4.5 meters long.

Each component in the SPLINE light can be removed, replaced, and modified.

The clips along the strap can be altered to play with the height and number of waves. The 2.5 meter long ropes used to hang the LED light can be used to change the curvature of the strap itself. They can be attached to the ceiling or wrapped around a tree

The prowess behind the lighting technology comes through in the LED strip which reaches 4,000 lumen (2 700 Kelvin) with a CRI over 90 for optimal colour rendering. Two LED strips and the unique hive pattern with 6 internal light cells provide 360° light coverage. A switch located on SPLINE's 10 metre-long cable can be used as a dimmer.

The SPLINE collection has been designed with great attention to detail and finishes, from the screws to the unique translucent satin finish on the LED silicon strip.

THE DESIGNER

DAVID DERKSEN

THE DESIGNER

David Derksen graduated from the Eindhoven Design Academy in 2009. During his studies, he opened his studio in Rotterdam. He alternates between industrial design and more experimental projects where he explores the limitations of materials.

David Derksen's work involves both his own projects and commissioned pieces. Since 2011, his studio has been on show at Salone del Mobile in Milan, collaborating with Dutch and international furniture brands and galleries.

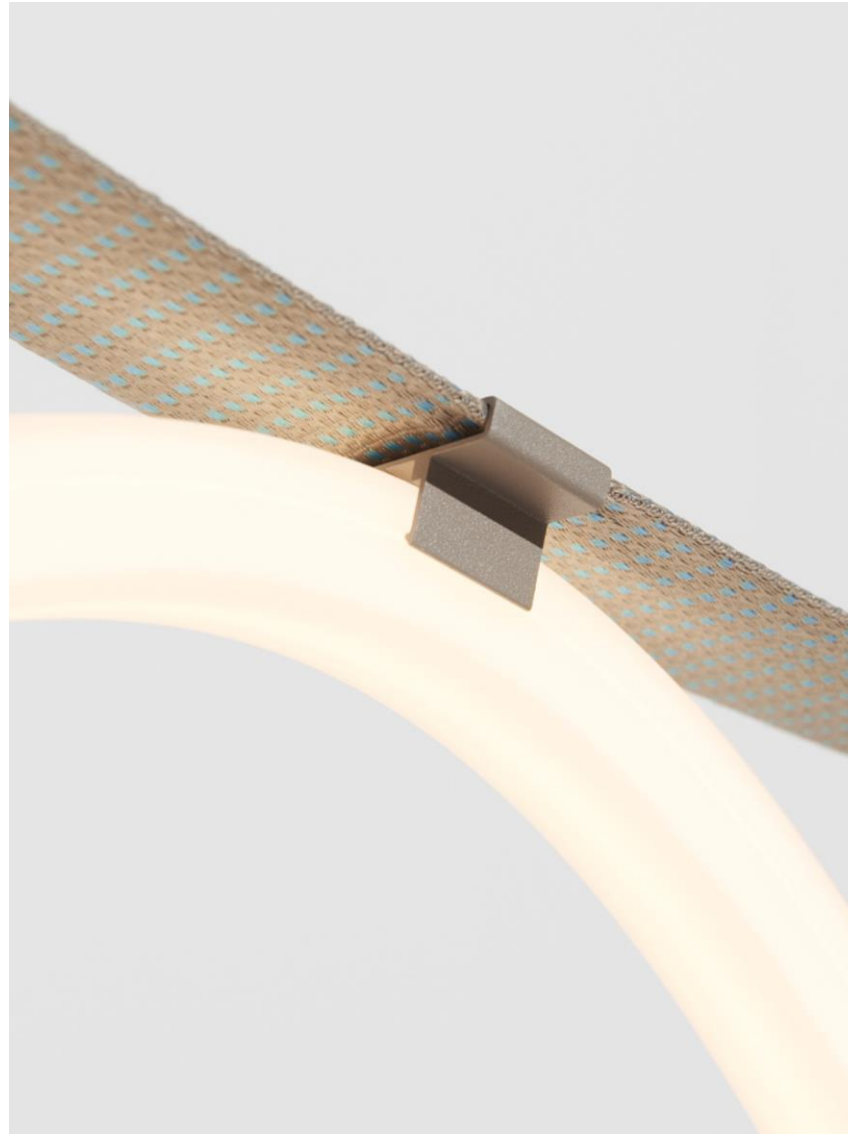

In 2015, David Derksen was nominated for the Young Designer Award at the Dutch Design Awards. In 2019, he was named Creative Director for the porcelain manufacturer WL Ceramics. In 2021, he launched his own collection of lights [ARRAY]. Then, in 2022, he joined forces with fellow founding partners to create the new Dutch lighting brand, Atelier Artiforte.

Inspired by ship ropes, the SPLINE series embodies flexibility and modularity and embraces the contemporary feel of LED technology with a fastening system that evokes rolling waves. Geometric curves are inspired by living organisms and mathematical precision.

MATERIALS

Polyurethane, silicone, aluminum, steel

LIGHT SOURCE

LED module – included – replaceable source

LIGHTING SPECIFICATIONS

2700K, 4000lm, 110-265V, 50-60Hz, CRI 90+, 60W max, dimmable, IP44/65

DIMENSIONS

Strap length: 4.5m

Cord length: 2.5m on each side

Electric cable: 10,0m, with touch sensitive hand dimmable switch

COLORS

Beige

Brown

PRICE

985€

925£
