S I N A

C. F. Møller Architects, 2024

Type

Salt and Pepper Mill

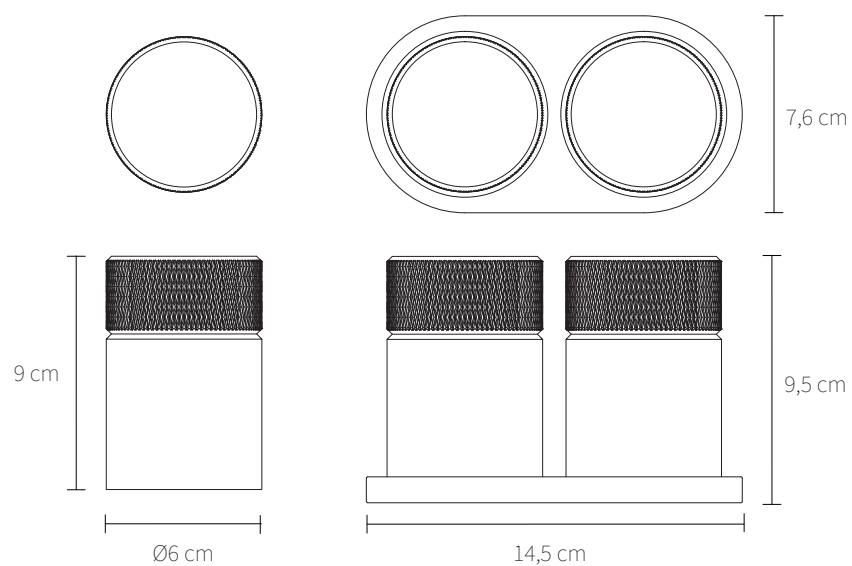

SINA is a salt and pepper grinder set created for those who appreciate both function and aesthetics. With its cylindrical base in solid wood and a turned metal top, the design balances the natural with the industrial in perfect harmony. The ridged metal surface ensures a comfortable and secure grip, while the ceramic grinding mechanism from CrushGrind® guarantees a smooth and precise grind – whether you prefer finely or coarsely ground spices.

SINA is not just a tool for cooking but also a beautiful element for the dining table. The two grinders come with an elegant tray that not only presents the set in the best possible way but also helps keep the table free from spice residue. Discreet markings on each grinder indicate which one is for salt, and which is for pepper.

SINA is available in two stylish material combinations: dark ash with a brass top and oak with an aluminum top. The set is the first product in the new SINA kitchen series, designed by C.F. Møller Architects for Gejst, marking the beginning of a new kitchen collection where fine craftsmanship and functional design go hand in hand.
