

Check the condition of the lamp after transportation and that all parts are in the box. Take out the lamp from the box and place on a flat surface.

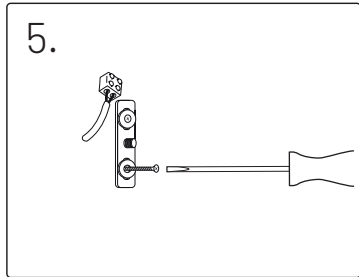

Mark holes for drilling.

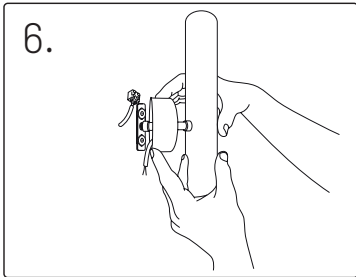

Drill holes. Be careful and do not drill through the wire.

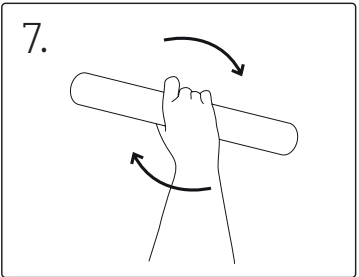

Place plugs

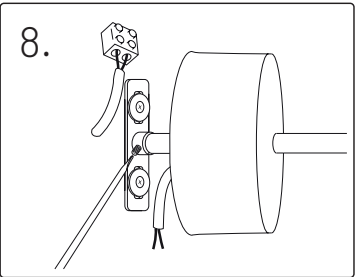

Screw the bracket.

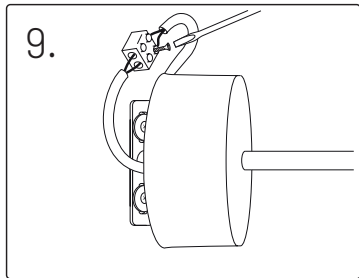

Fix the lamp gently.

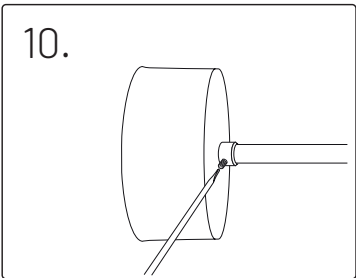

Turn the lamp to the desired position, until you reach natural stopping point.

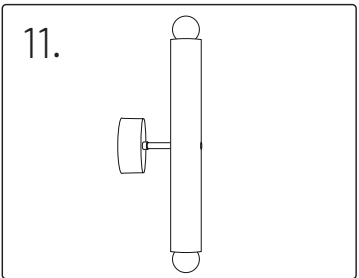

Lock the lamp with small screw on the ring.

Connect the lamp to power supply.

Lock the wall cup with the ring and screw.

Enjoy my almost natural picture of the lamp.

TRN lighting

The TRN collection combines calligraphic forms and bold colors with high-quality handcrafted and fine materials. The design of the lamps draws inspiration from the world of painting. Abstract signs of the lighting allow us to build compositions that resemble a mysterious alphabet. Our collection is produced by Pani Jurek manufacture in Poland, using sustainable guidelines. It is time-consuming to attend to every detail but it produces a high-quality product. We avoid overproduction and waste no materials during the production process. TRN lighting is made and glazed by hand, therefore the models and colors may vary slightly.

How to install

Only a qualified electrician may attach the light to the mains. The electrical supply circuit must incorporate an interruption mechanism such as a switch or a fuse. The light is attached directly to the main cables. **Please note: always disconnect these cables from the power supply before attaching the light.**

Cleaning and maintenance

Always ensure that the light is disconnected from the electricity supply when changing the bulb or cleaning. Use a dry cloth to clean the outside of the light. Do not use scouring agents or solvents. Do not permit any liquid to enter the light during cleaning. Avoid touching brass elements with bare hands.

Safety notice

Comply with national security regulations when installing and operating the light. The manufacturer is not liable for any damage or injury arising from incorrect installation or use. Persons making the modification to the light shall be deemed to be the manufacturer in instances of product-related liability.
