# Arc tables

Designed by Ditte Vad and Julie Begtrup

## English text

Arc takes its name from the mathematical concept of a smooth curve joining two points in a circle. The Arc table invites its user to make use of the simple functionalities. Use one finger to turn the upper tabletop. Let it be open with your favourite objects on display or close the lid to hide your mess.

By simply rotating half of the circular lid, the expression of the table is ever changeable. The muted dark grey surface on the inside storage space is selected to complement the wood while the three-legged construction adds a playful and light touch to the geometric shaped design.

### Designed by Ditte Vad and Julie Begtrup

The two Danish design talents studied together and found that they shared the same aesthetic sense, view on materials and expressions in their designs. With a belief that designers have the opportunity to improve the surroundings, they aim to create honest and functional designs that allows a dynamic interaction between the design and its user.

## Danish text

Arc tager sit navn fra det matematiske koncept, hvor en blød kurve forbinder to punkter i en cirkel. Brug blot en finger til at dreje den øverste halvcirkel for at ændre bordets udtryk. Skab et åbent rum til dine yndlings designobjekter eller skjul hverdagens rod ved at lukke pladen. For at komplementere træet er bunden i det cirkulære opbevaringsrum dækket af en dæmpet mørke grå tone, mens den trebenede konstruktion tilføjer lethed til den geometriske form.
