Description

The new collections More, Sypha and Medousê have brought us out into the open, leading us to find brand new solutions for our outdoor products. An example of this is the new version of Fil de Fer F IP65, available from May. It is provided with the latest generation low voltage LEDs, created especially for Catellani & Smith and it has been enhanced by housing the IP67 transformer in a black cylindrical box with logo. The exquisite beauty is the same as always: a luminous sphere that brings a magical light to gardens and terraces, made all the more unique by these new details.
