Silver half sphere Globe G95 LED
light bulb 7W E27 2700K Dimmable

Product short description:

The 7W Globe G95 LED light bulb with silver half sphere combines the energy saving technology of LED with the warm pleasantness of the vintage aesthetic.

The light bulb is made out of transparent glass, with its lower end covered in a silver colouring for a unique lighting effect.

The light bulb has a luminosity of 806 lumens, equal to that of a traditional 60W bulb. With its 2700K colour temperature, it glows with a warm, enveloping light, with all the advantages of energy saving LED technology.

ATTENTION: to properly dim an LED bulb, a specific dimmer or the latest generation of universal dimmers is required. You will find a specific section on our website with a selection of both wall and in-line models.

Product description:

Light bulb type: LED
Shape: Globe
Fitting: E27
Diameter: 95 mm
Length: 140 mm
Volt: 220-240 V
Watt: 7 W
Energy efficiency class: A++
Colour temperature: 2700° K
Lumen: 806 Lm
Dimmable: Yes

Our bulbs with straight filament can work with all DIMMERS (TRIAC or IGBT), while for curved filament bulbs, IGBT dimming is highly recommended.

For the choice of the dimmer: in addition to the maximum power of the user, the minimum power must also be considered, because when the regulated power is lower than the minimum rating, the user can "flicker" and / or be damaged.
